Assignment

Subject: programing_fundamental_lab_4

Professor: Mr. Asad Majeed

Student Name: Ali Raza

Class: bs computer science (1st semester)

Section: D

Roll number: 04

Date: 14 oct 2026

GHAZI UNIVERSITY DERA GHAZI KHAN

Task1:

Write a program to print positive number entered by the user. If the user enters negative number print number entered is positive otherwise print number is negative.

```
#include<iostream>

using namespace std;

int main()

{

	int a;

	cout<<"enter a number: ";

	cin>>a;

	if(a>0)

	{

		cout<<"entered number is positive: "<<a;

	}

	else

	{

		cout<<"entered number is negative: "<<a;

	}

	return 0;

}
```

Output:

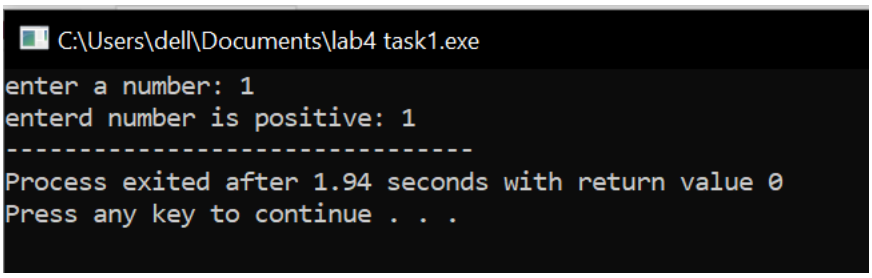

```
enter a number: 1

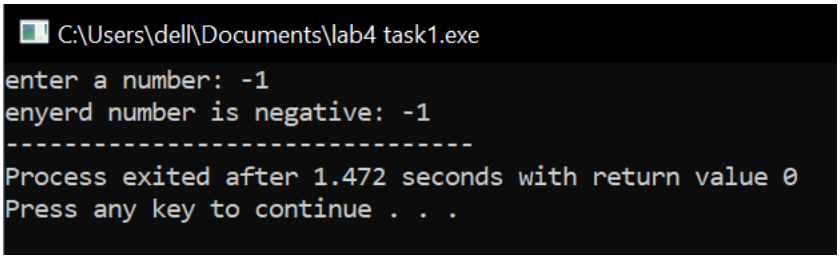

entered number is positive: 1

>>>>>>>>>>>>>>>>>>>>>

enter a number: -1

entered number is negative: -1
```

Task2:

Program to check whether an integer is positive, negative or zero.

```
#include<iostream>

using namespace std;

int main()

{

	int a;

	cout<<"enter a number: ";

	cin>>a;

	if(a>0)

	{

		cout<<"the entered number is positive: "<<a;

	}

	else if(a<0)

	{

		cout<<"entered number is negative: "<<a;

	}

	else
```

```
        {
                cout<<"entered number is ZERO: "<<a;
        }
        return 0;
}
```

Output:

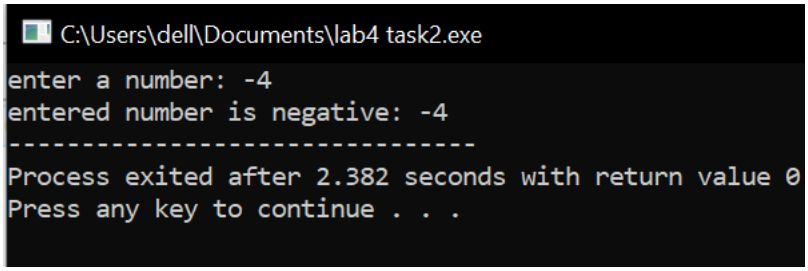

enter a number: 3

the entered number is positive: 3

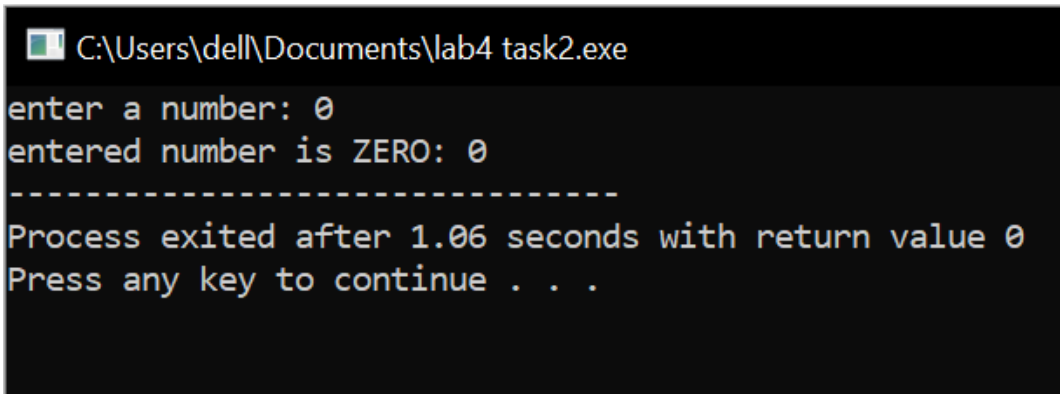

enter a number: -4

entered number is negative: -4

enter a number: 0

entered number is ZERO: 0

Task3:

Input: Mark Process:

If mark greater than and equal to 75, score will be A If mark less than 75 and greater than and equal to 60, score will be B If mark less than 60 and greater than and equal to 45, score will be C If mark less than 30, score will be D output :

Print the grade of your score.

```
#include<iostream>
using namespace std;
int main()
{
	int marks;
	cout<<"enter your marks: ";
	cin>>marks;
	if(marks>=75)
	{
		cout<<"Grade :  A";
	}
	else{
		if(marks>=60)
		{
			cout<<"Grade : B";
		}else
		{
			if(marks>=45){
				cout<<"Grade : C";
			}
```

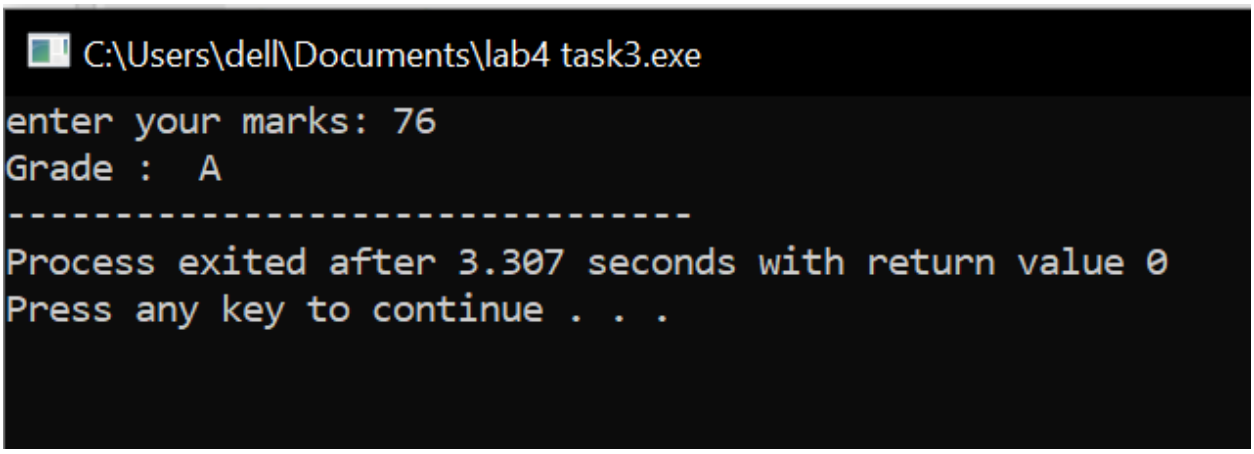

```
                else{
                        if(marks>30){
                                cout<<"Grade : D";
                        }
                        else{
                                cout<<"Better luck next time";
                        }
                }

        }
   }
  return 0;
}
```

Output:

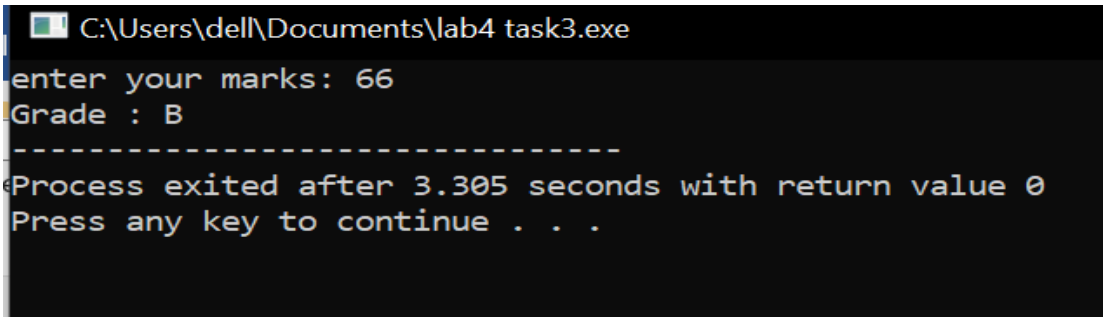

enter your marks: 76

Grade : A

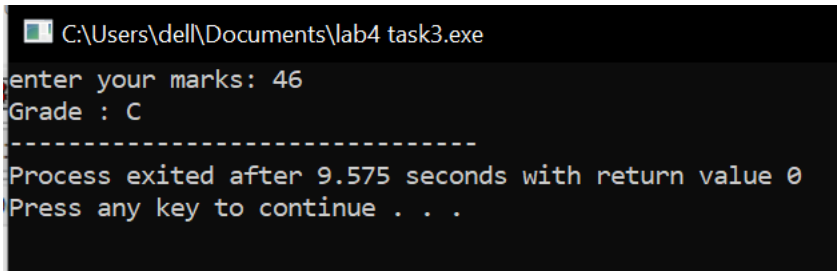

enter your marks: 66

Grade : B

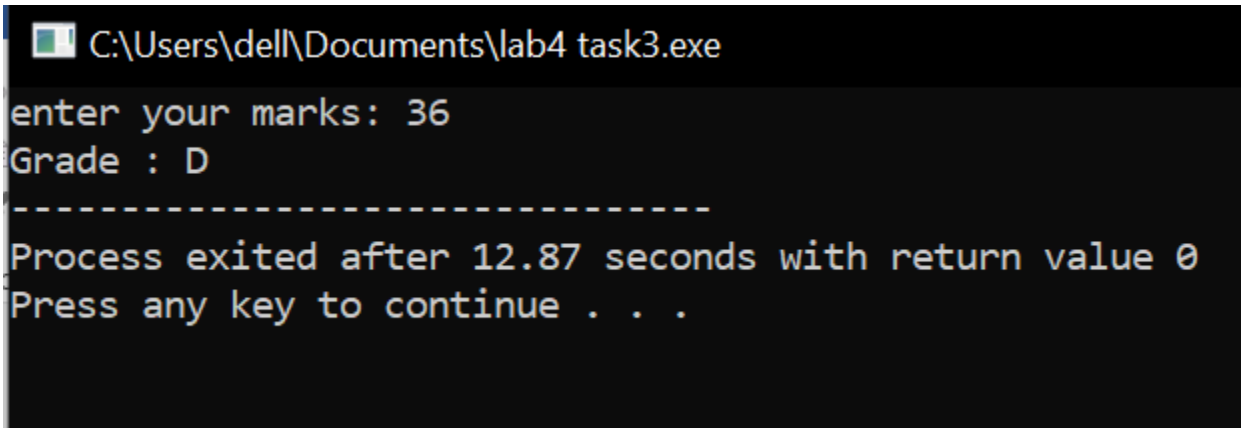

enter your marks: 46

Grade : C

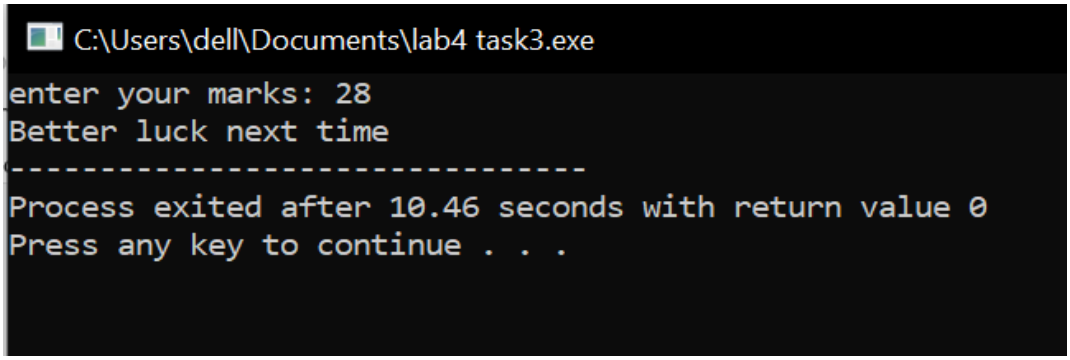

enter your marks: 36

Grade : D

enter your marks: 28

Better luck next time

Task4:

Find Largest Number Using Nested if...else statement. Check whether the number entered by the user is positive or not. If it is positive then calculate how many digits the number have.

```
#include<iostream>

using namespace std;

int main()

{

	int a,b=0;

	cout<<"enter a number: ";

	cin>>a;

	if(a>0)

	{

		while(a>0)

		{

			a/=10;

			b++;

		}

		cout<<"the number is positive: "<<a<<endl;

		cout<<"number of digits: "<<b<<endl;

	}

	else
```

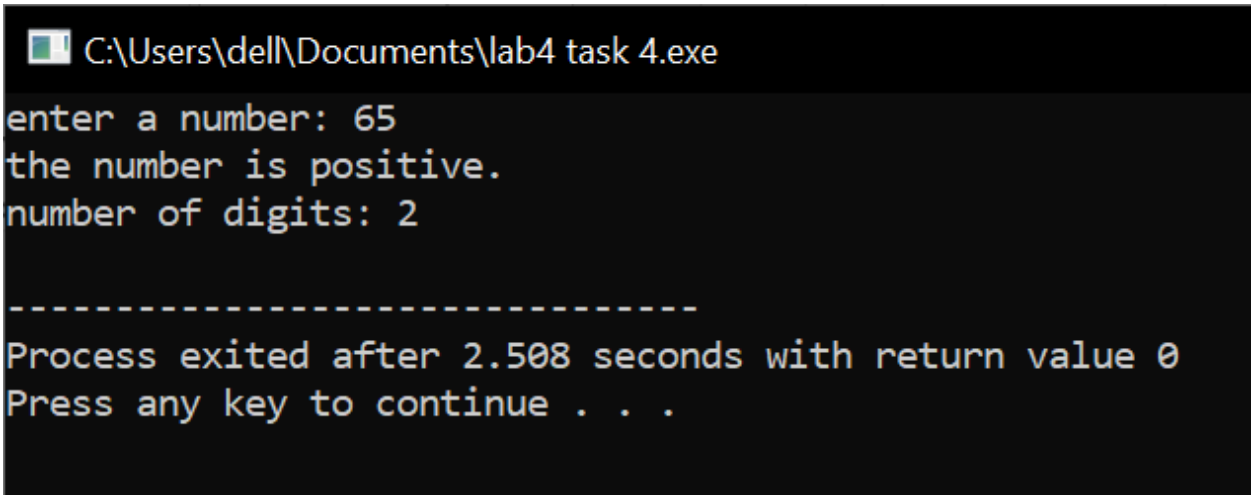

```
        {
                cout<<"entered number is not positive: "<<a;
        }
        return 0;
}
```

Output:

enter a number: 65

the number is positive.

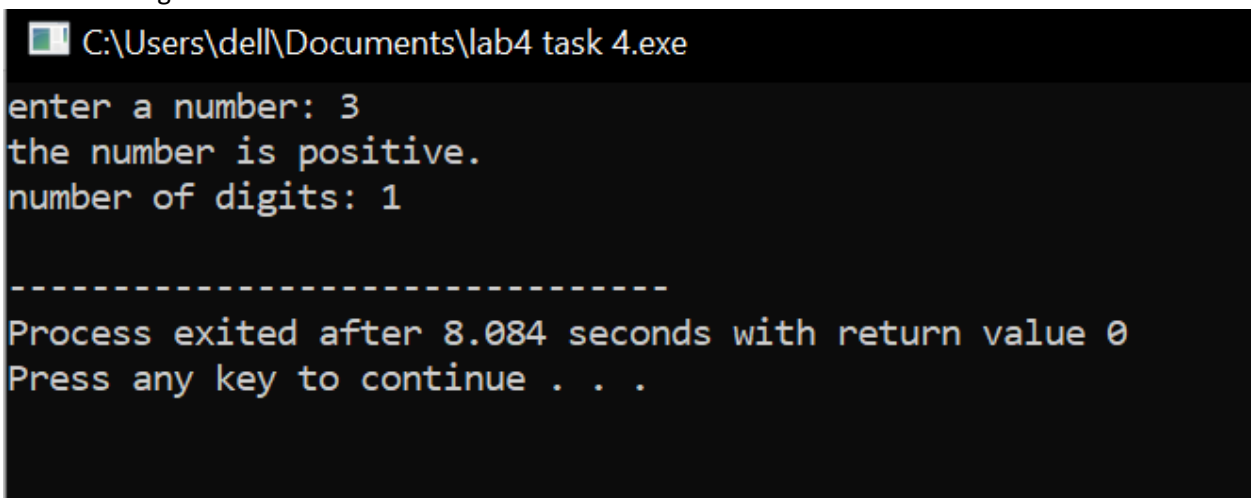

number of digits: 2

enter a number: 3

the number is positive.

number of digits: 1

enter a number: -6

entered number is not positive: -6
